As the times change, Broward County must remain at the forefront to continue thriving and being a preeminent destination to live and visit. The County continually sees evolution in transportation, infrastructure, and development. Broward County is such a unique place and offers diverse opportunities for any lifestyle. As a result, this constant evolution calls for general changes in the management and efficiency of how we operate to embrace and be prepared for change.</p> <p>Would like to see changes made to the land use planning process. There appears to be opportunities where this could be streamlined. Propose the county-wide election of a County Mayor versus the current rotation of a ceremonial Mayor. As an alternative in case this initiative failed, would propose the ceremonial Mayor serve in the capacity for two years instead of one year to provide for continuity. Also a discussion should be had regarding certain elected officers and transitioning to chartered officers appointed by the County Commission or hires of the County Administrator. Another change that may be recommended is either removing the ethics commission from the Charter or adds provisions that allow the Inspector General to have enforcement authority. Removal of the Administrative Code is another change needed to the Charter. There are other vehicles for this to be accomplished, but the Charter does not seem like the appropriate place. Also open minded to other changes or suggestions that may be presented during the review process.</p>
